

BA (HONS) HISTORY & HERITAGE

From ancient to modern worlds-travel through time and place with our History & Heritage degree

This is a wide-ranging University of Chester degree that focuses on international history and heritage.

The primary focus of the degree is on history. Throughout the degree, you'll study a range of core and optional modules that will introduce you to some of history's most significant themes and events. You'll learn how to evaluate historical sources, analyse evidence, construct an argument, and communicate your findings effectively.

Heritage gives us a different perspective on the study of the past and on the way in which the past impacts upon us today. You'll have the opportunity to examine some of the key issues in heritage studies today, including the politicisation of heritage, decolonisation, and the role of heritage in society.

Our History & Heritage degree gives you the skills you need to find employment in a range of sectors. You'll become an independent thinker and problem solver and you'll develop a range of transferable skills that are highly valued by employers. History and Heritage graduates routinely find employment in business, management, law, the media, marketing, government, public relations, civil service, education, the heritage industry, and tourism.
