Angeliki Tsolka

Environmental & Sustainability
Consultant Greece & Isle of Man
AECOM

Presenting: Closing the Loop: Exploring
Circular Economy Opportunities for the
Isle of Man

Angeliki Tsolka over a decade of professional experience in the UK and Greece. She has worked across major infrastructure and development projects, collaborating with clients, specialists and multidisciplinary teams throughout different stages of project development. Her experience includes waste and resource management, environmental impact assessment, sustainability, environmental due diligence and regulatory compliance.

Earlier in her career, she spent several years specialising in waste management, contributing to waste strategies and management plans, material reuse assessments and environmental assessments for major infrastructure and development projects.

Throughout her career, she has also taken an active role in environmental project coordination, supporting the effective delivery of multidisciplinary projects. Angeliki holds an MSc in Environmental & Earth Resources Management from Kingston University and a BSc in Geology from the University of Patras. She is also trained in Circular Economy principles. Her interests include sustainable resource management and the practical application of circular economy principles, with a focus on how environmental considerations can inform better decisions for infrastructure, development and communities.
