

RESEARCH FESTIVAL 2026 - PRESENTER BIO

Niamh Rowe
Taxa Genomics

Presenting: Environmental DNA (eDNA)
on the Isle of Man to monitor and
understand our Biosphere

Niamh Rowe is a Laboratory Technician at Taxa Genomics. She joined the company in 2025 after completing her BSc in Zoology and MSc in Wildlife Conservation. Since then, she has been worked on a range of projects contributing to eDNA research and development on the Isle of Man. Niamh is particularly interested in community engagement in conservation and making science more accessible and useful to local communities and conservationists.

At the UCM Research Festival, Niamh will talk about how applied genomic tools can support biodiversity monitoring and research on the Isle of Man and further afield.
